

Wan2.1-T2V-1.3B, single object (step 4, seed 42)

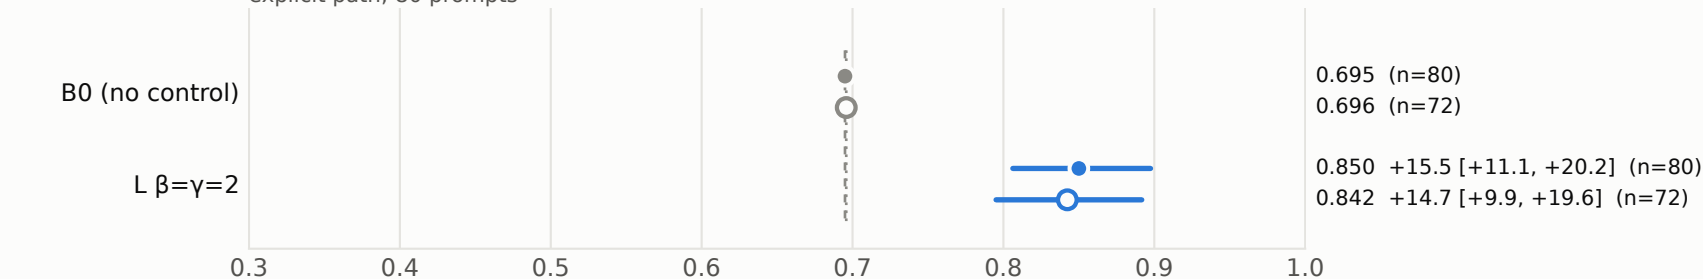

explicit path; 80 prompts

all 80 prompts (or all pairs)

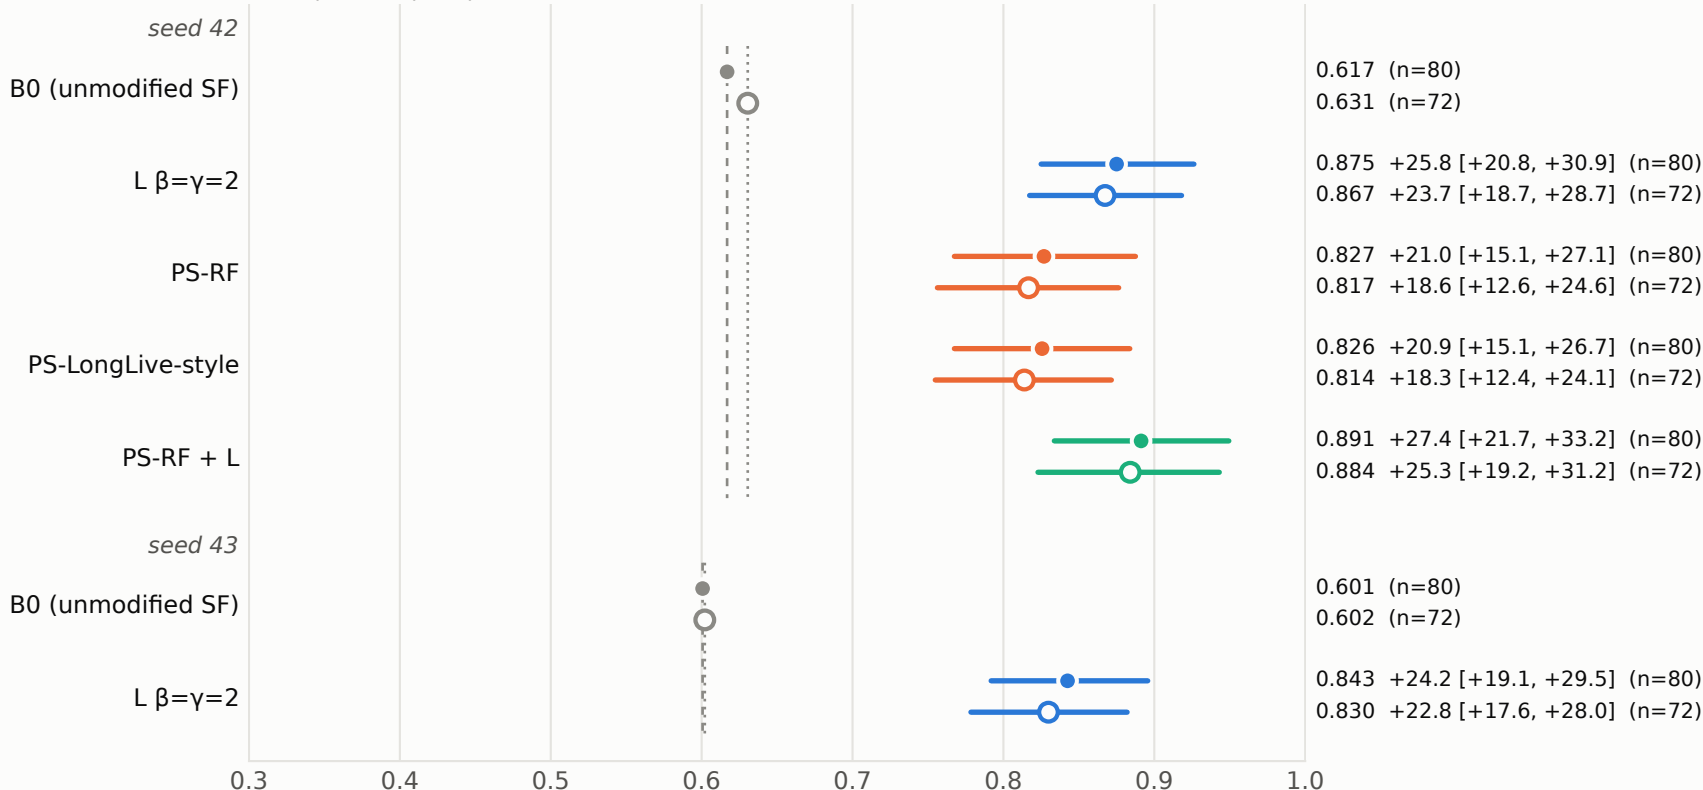

72 non-pilot prompts

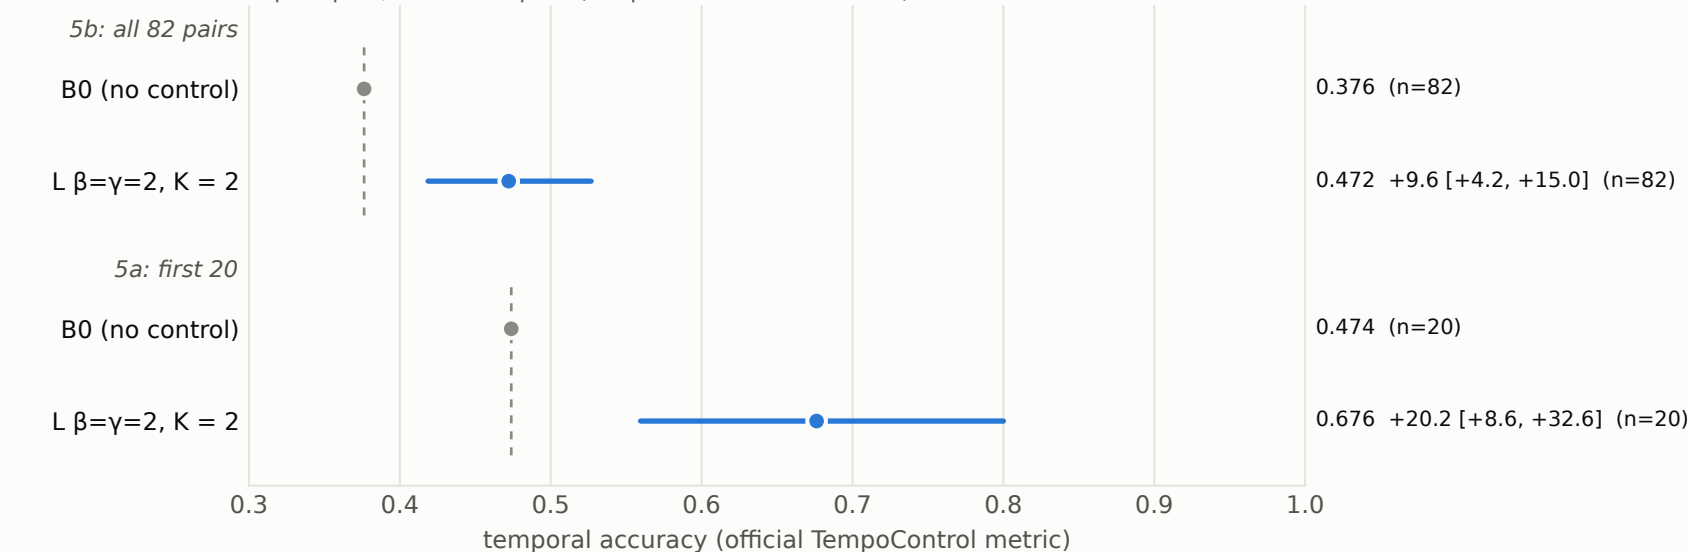

Self-Forcing (streaming, 3-frame chunks), single object (steps 3b, 3c)

fa2kv path; 80 prompts

Wan2.1-T2V-1.3B, two objects (steps 5a, 5b, seed 42)

explicit path; 5b = all 82 pairs (TempoControl: 37.5 → 53.2 %)

temporal accuracy (official TempoControl metric)

Dots: mean accuracy. Bars: 95 % bootstrap CI (10,000 resamples) of the paired difference vs B0 of the same group, drawn around the arm's mean. Filled = all 80 prompts, open = 72 non-pilot prompts; grey dashed / dotted line = B0 mean on 80 / 72 prompts. Right: accuracy, Δ vs B0 in points [95 % CI]. PS = prompt switching at the scheduled time (step 3c baselines).
